Re: Heating System - Installation of New Burner

9th December 2021

Dear Parents/Guardians,

As previously indicated, the school's heating system requires a new burner. The installation of the burner was delayed until now due to supply issues. Thankfully, we have got confirmation that we have secured a new burner and it can be installed tomorrow, Friday 10th December 2021.

This will require the heating (which is temporarily up and running) to be switched off for a period of time to allow those working on it to complete the installation of the new burner which will take a number of hours.

Therefore, all year groups (except 6th Years) will finish school early tomorrow. 6th Years will be relocated to the new part of the building where the heating will be on and will continue with lessons until 1pm. All other students will go home at the following times;

1st Year - 10.45am

2nd Year - 10.45am

3rd Year - 11am

Transition Year - 11am

5th Year - 10.45am

Thank you for your understanding.

Yours sincerely

Bernadette Fitzgerald
Principal
